

BETTER INFORMED, BETTER CARE

Clarity is an online platform that provides operational and usage information from the Zen-O™ and Zen-O lite™ portable oxygen concentrators - allowing home oxygen providers to:

- Monitor device performance and carry out predictive maintenance
- Track device location using GPS and GSM technologies
- API integration available

REMOTE MONITORING SUPPORT

Clarity can be securely accessed on any device, anywhere in the world at any time. Clarity provides data that allows home oxygen providers to carry out predictive maintenance. Its user friendly platform and customizable dashboard delivers information most valuable to you.

ASSET OPTIMISATION

Use the data to manage your assets.

REPORTING

Easily generated reports are available on a single device or your entire fleet.

ALARMS

Using simple traffic light system alarms, home oxygen providers can see the performance of their assets and detect any potential issues before they arise.

 **Attention**  **Caution**  **OK**

ASSET MANAGEMENT

GPS and GSM technologies on all connected Zen-O™ and Zen-O lite™ devices helps you determine the location of your assets.
