Little Anne

Improving the efficiency of instructor-led CPR training

The latest generation Little Anne takes your CPR classroom setup and training experiences to the next level with a simple yet sophisticated design that makes everything easier and more efficient. The new Little Anne is QCPR enabled and built with the expected durability of a Little Anne, all while six manikins can stack inside the travel case. Plus, the new design is made with recycled plastics to reduce CO2 impact.

Little Anne

Easy Setup

No extra tools required to setup or replace parts.

Filter System

Setup in a snap and save time from replacing lungs as often.

Future Proof

Designed to be easily upgradable for tomorrow's needs.

Perfect Pack

Six manikins plus parts and consumables fits in one convenient rolling case.

Stackable Design

Manikins easily stack for convenient transport and storage.

QCPR Enabled

Get quality feedback on compressions and ventilations.

Expected Durability

Even with a lighter build, Little Anne meets Laerdal's high durability standards.

Recycled Material

Manufactured from recycled material for improved sustainability and reduced CO2 impact.
